

# Hose Inflation Kit

The Fire Hose Inflation Kit provides a front line, first response solution for water rescue where the casualty is conscious and able to help themselves during rescue. This compact, robust kit can be deployed in seconds with ordinary fire hose and used in a number of different water rescue techniques.

To use, simply connect the required lengths of hose together, fit the couplings from the kit to the ends of the hose system, and inflate. The system can then be deployed in various ways, depending on the prevailing conditions:

**Line retrieval** - The hose can be directed from a safe land position towards a conscious casualty and can then be retrieved with the casualty in tow.

**Boom rescue** - Used on flowing water, the inflated hose can be positioned at an angle across the flow to provide a buoyant lifeline for waterborne casualties. The angled boom allows a safe, controlled route to safety.

Alternatively, a line can be attached to the coupling and thrown to the opposite bank to provide a dam to catch casualties coming down in fast flowing water. It can also be used to contain small amounts of oil floating on the water surface.

- Deployed in seconds
- Versatile
- Supplied in a compact portable case
- Shut-off cap/coupling with locking pin prevents accidental release
- Exceptionally tough and durable
- Minimal training, servicing and maintenance costs
- Optional inflation cap with Y Piece which includes a relief valve to reduce the need of a regulator

## Used For:

- Crisis Rescue
- Flood Rescue
- River Rescue
- Boom Rescue
- Line Retrieval

KIT 1	KIT 2
Large Red Carry Case	Small Yellow Carry Case
Hand-Held 3 Bar Controller	Regulator
Regulator	Inflation Cap with Relief Valve
Inflation Cap	End Cap
End Cap	Delivery Hose 2m
Inflation Hose 5m	-
Delivery Hose 2m	-
