

The Jet Ski Rescue Board is an inflatable board that is designed to be attached to the back of a jet ski to aid rapid response and rescue of casualties. It is attached by three towing and control 'D' rings located at the front of the inflatable board.

The board has either 10 handles (large size) or 8 (small) fitted around the top sides to make it easier for the casualty or rescue crew to hold onto the board whilst in use.

Fully inflatable the Jet Ski Rescue Board is lightweight and portable and can be quickly inflated when needed. The board deflates quickly and is easy to pack away into the valise provided.

FEATURES

- Lightweight and easily portable
- Used in conjunction with a Jet ski for a rapid response rescue
- Design has 8 or 10 handles to make it easier for the casualty or rescue crew to hold onto the board whilst in action
- The underside of the board is double skinned for maximum abrasion resistance
- Exceptionally tough and durable
- Rapid inflation and deployment
- Minimal training, servicing and maintenance costs

USED FOR

- Rapid Response Rescue
- Sea/surf rescue
- Flood Rescue
- River Rescue
- Flooded coastal and urban areas
- Casualty Recovery
- Deep Water rescue
