

Wherever you can take an LPG bottle, you can take the HOTTAP—the ultimate compact water heater designed for off-grid use. Lightweight and easy to carry, it seamlessly integrates with our assisted decontamination system, delivering up to 16 hours of continuous operation on a single gas cylinder. Its 2-stage water filtration system lets

you draw water directly from a jerry can or small container, ensuring clean, safe use in remote locations. And even in winter, HOTTAP's powerful 37,500-BTU burner provides instant, steaming-hot water at the flick of a switch. Reliable, portable, and built for tough conditions—HOTTAP keeps you prepared wherever duty calls.

FEATURES

- World's smallest heater in its class
- Hot water at the flick of a switch
- Fast setup with quick-connect gas and water connections
- Runs from an LPG bottle for off-grid use
- Two-stage water filter to remove fine sediment

USED FOR

- Decontamination showers

TECHNICAL DATA

Product Code (Camlock)	DSA014
Product Code (Storz)	DSA014/01
Run Time with 9kg Bottle	~15hrs
Battery	2 x D-cell (for ignition only)
Flow Rate	2.5 - 6.0 l/min
Max. Temperature	50°C
Weight	4.2 kg
Dimensions	590 x 470 x 300 mm
