

The Ford 6500W Petrol Generator is a robust and reliable power source, delivering a maximum output of 6500W and a continuous output of 6000W. It features a powerful 420cc, 15HP engine and runs for up to 13.5 hours at 50% load, making it ideal for extended use in demanding environments. With both electric and recoil starting options, the unit is easy to operate and includes an Automatic Voltage Regulator (AVR) to ensure stable power delivery.

Equipped with two 115V 32A outlets and one 230V 32A outlet, this generator offers versatile connectivity for a range of equipment. The 25-litre fuel tank supports long run times, while its compact design—measuring 700mm x 680mm x 680mm and weighing 86kg—makes it suitable for transport and storage. Operating at a noise level of 72dB(A) at 7 metres, it balances performance with low acoustic impact, perfect for both on-site and backup power applications.

FEATURES

- Single cylinder 4-stroke OHV, air cooled engine.
- Recoil / Electric start.
- 12V 9Ah battery included.
- Automatic Voltage Regulator (AVR).
- Low oil sensor.
- Digital 3-in-1 meter (Voltage / Frequency / Time).
- Circuit breaker.

USED FOR

- Shelters
- Decontaminations Showers

TECHNICAL DATA

Max. Output	6500W
Continuous Output	6000W
Displacement	420cc
Horse Power	15HP
Run Time At 50% Load	13.5h
Outlets	2 x 115V 32A, 1 x 230V 32A
Fuel Tank Capacity	25L
Frequency	50Hz
Length	700 x 680 x 680 mm
Weight	86kg
Fuel Type	Petrol
Noise Level	72dB(A) @ 7m
Starting Method	Electric / Recoil
AVR (Automatic Voltage Regulator)	Yes
